

Table in HTML

sabse pahle table tag ka use karna padega

<table>

</table>

<table> for line-separation
border = "1" in

<td> Name </td>

<td> Role </td>

table ka data

Name Roll

</table>

<tr> ka use karke batayenge ki hm koun-si row mein data fill kar rahi hai.

<tr>

} inke bick me jo data aayega vo ek row mein aayega

</tr>

<tr>

} same inke bick me jo data

</tr>

hoga ye dusre row mein aayega.
