File path system

Relative Path	Absolute path
↓	
current path se hi exact location bata denge	ekdm zero se exact road/path bata denge

ex: **dog.png** ↓

ex:

root
- lion.png
- cat.png
- Alpha
  - dog.png
  - index.html
  - Beta
    - home.html
    - cow.png
    - Photos
      - first.png

ex: **Beta/cow.png**

Phle Beta folder me jaayenge
फिर इसके अंदर ·· cat.png then cow.png
इसका ये cat.png access कर lenge
ke access

\# same level pe access
karne ke liye
siddhe access kar
sakte hai
other wise Absolute path

Beta/photos/first.png

DIY

div = tag → container ka kaam karta hai

UTF-8 → Dictionary ke jaise har chij ko binary no me store karega.

classes & id's

class ⟶ Group ke jaise kam karta hae
↳ access by .

id ⟶ id unique hota hae
↳ access by #

याद → id kabhi bhi same nahi ho sakta (always unique)
class ke name same ho sakte hai

```
<header>

</header>

<main>  ⟶ enke andar content
</main>      likha jayega

<footer>  ⟶ extra info
</footer>
```
